## Have You Ever Googled "Cheap Insurance"?

*We bet that you have. We also bet that you have heard the saying: "You get what you pay for."*

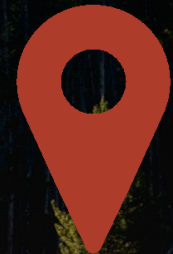

**We have a life secret to share with you:** Instead of getting cheap quality insurance, get rewarded with stable coverage discounts! Here are just some of the main money savers that the Mosaic team looks for when we shop for new *and* current clients. While chatting with your agent, he or she will see if there are any discounts that you qualify for now, as well as ones that you could possibly get in the future. **Also, carriers always find new ways for you to save, and your agent always keeps updates on their radar!**

# Can Working with an Independent Insurance Agent Save You Money?

**We sure think that it can!** We crunched our numbers, and we found that the average person who switches to Mosaic Insurance Alliance, LLC. saves between **15% to 20%**! *Give your agent a call today and they will see how much you can save.*

**Also, don't get us wrong**—it's possible for you to get the same savings elsewhere...if you know what to specifically ask for at the right moment, or you get another independent agent or salesperson with an active attitude who has extensive knowledge of the current programs. *When you are paired with a Mosaic teammate, there is no guesswork and they do all the footwork.*

**Plus, working with us can save you time!** With Mosaic, there are no more long holds, pressing endless buttons to direct a call, dealing with a robot, and hearing elevator music! It is our mission to figure out which insurance company is the best fit for you, determine what important endorsements should be discussed based on your situation, search for different current saving opportunities, and ask you if you are interested in future carrier programs that can save you money.

## What Does It Mean to Be a Good Driver?

**What do you have to do to qualify for a good driver discount?** Good driving discounts are often called safe driving discounts for a reason. Carriers have factors like those below that decide what is good (safe) driving.

- **Little/no hard braking.** Gradual and smooth braking is key. Hard braking can signify that you aren't alert, aren't ideally flowing with traffic, are in unsafe territory, and/or created an unsafe situation that could have led to an accident.
- **Little/no hard acceleration.** Fast acceleration can be seen as aggressive driving. Also, gradually accelerating can give you more reaction time and give you a better understanding of road and weather conditions. Plus, aggressive acceleration can be bad for your car, especially if it's not completely warmed up (you don't want to be hit on the freeway from a sudden breakdown!).
- **Avoiding hard turning.** Like with hard braking and accelerating, it is deemed dangerous to take hard turns. You want to do the recommended turn speed limit or less—whatever is currently safest.
- **Driving low miles.** The longer you are on the road, the more chances you have to hit someone, be hit by someone, run a red light, become fatigued, etc.
- **Having little idle time.** Idle time signifies traffic. Traffic signifies a higher chance of hitting someone because there are more people on the road to hit and there are many chances to get a fender bender.
- **Little or no nighttime driving.** It's harder for you and others to see in the dark, crime is more dominant, drivers are likelier to be tired, there are less witnesses, security cameras catch less, and street racing is more common at night. All these factors expose you to more risk than daytime driving.

## 5-Star Client Reviews

"Been with Mosaic from the start. We started using **Amy Drewel** way back when she was with another company for all our personal insurance needs, which was about [2009]. We moved with her when she started Mosaic. Our policies have morphed from renters & car insurance to home owners & auto insurance and most recently business insurance needs. Her team of people always take care of us. Patty and Karen are amazing! I recommend them to all my friends. Recently, a friend took our recommendation and called me to tell me Thank You because their customer service is amazing. ~Jo Anne A.

"**Paul** is my go-to insurance agent for not only my clients but also myself. Great customer service, follow-through, and very competitive rates to name a few of the reasons why I refer my clients to him with confidence. I couldn't think of a better person for the job! ~Dave Z. | Mortgage Master
